PROFESSIONAL SUMMARY

Results-driven React & Frontend Software Engineer with deep expertise in building high-performance, responsive web and mobile applications using **React 19/18, TypeScript, Next.js (App Router), and React Native (Expo SDK 58)**. Lead frontend and systems architect for **SKZ Trading**, deploying real-time financial dashboards with sub-100ms WebSocket updates and 99.9% uptime. Co-author of an applied AI and software engineering research paper submitted to the prestigious **IEEE Transactions on Software Engineering (IEEE TSE)**. Extensive experience implementing component-driven design systems, state management, complex 3D visualizations (**Three.js / WebGL**), and automated test suites (**37 tests in Jest**). Certified in Agile (**Scrum SFC™**), advanced English communicator with extreme ownership, and forensic attention to UI performance, responsiveness, and clean architecture.

CORE TECHNICAL SKILLS

⚛ React & UI Engineering
React 19/18, Next.js (App Router, SSR, SSG), TypeScript, JavaScript (ESNext), React Native (Expo SDK 58), Tailwind CSS, Vite, HTML5, CSS3, Core Web Vitals optimization.

🔄 State Management & Streaming
Custom React Hooks, Context API, Zustand, Redux Toolkit concepts, React Query / TanStack Query, RESTful API integration, WebSockets (real-time bidirectional streaming).

🌐 Interactive 3D & Data Viz
Three.js, React Three Fiber (R3F), WebGL 3D meshes & point clouds, Lucide Icons, Recharts (real-time telemetry and data visualization charts).

🧪 Testing, Architecture & DevOps
Automated testing with Jest & React Testing Library, Clean Architecture, Git/GitHub (GitFlow, PRs), CI/CD (GitHub Actions), Docker, Vercel deployments, Scrum (SFC™ Certified).

PROFESSIONAL EXPERIENCE & PRODUCTION SYSTEMS

Lead Frontend & Full Stack Software Engineer — SKZ Trading `24/7 Production` Jul 2026 – Present

High-velocity digital asset algorithmic trading SaaS integrated with real-time financial APIs and market feeds

- **Real-Time React Dashboard:** Architected and deployed an executive analytics web dashboard using React (Vite) and TypeScript, consuming WebSocket market feeds with live order book telemetry and sub-100ms latency.
- **Security & Authentication:** Implemented two-factor authentication (2FA) via dynamic QR code generation, session state safeguards, and local asymmetric encryption (Ed25519/AES) adhering to OWASP Top 10 security standards.
- **Financial Telemetry & Analytics:** Designed modular UI components with interactive data visualization charts, automated profit-margin calculations, and instant webhook confirmation for PIX payouts with 99.9% uptime.
- **Performance Optimization:** Minimized unnecessary re-renders using custom React hooks, memoization (`useMemo`, `useCallback`), and lazy loading, reducing initial bundle size by 40%.

KEY ENGINEERING PROJECTS & APPLIED RESEARCH

GymFlow — Mobile-First Smart Gym SaaS Platform

Next.js / TypeScript / Vercel

Sep 2026

- **Modern Next.js Architecture:** Built a high-performance web app utilizing Next.js 14 (App Router), TypeScript, and Tailwind CSS, fully optimized for mobile viewports (`viewport-fit=cover`) and deployed to **Vercel** with edge caching.
- **Anti-Fraud Dynamic Token System (GymFlow Pass):** Engineered a dynamic rotational QR-code access pass with 30-second in-memory expiration cycles to eliminate unauthorized screen-sharing.
- **Interactive Workout Builder:** Designed a component-driven split training interface with interactive haptic rest timers, real-time tonnage calculation, and integrated payment checkout via Mercado Pago.

Bodega do Vidigal — Offline-First POS & Kitchen Display System (KDS)

React Native / 37 Tests

2026

- **Offline-First React Native Application:** Built a cross-platform Point of Sale (POS) and Kitchen Display System (KDS) using React Native (Expo SDK 58), operating 100% offline via local Wi-Fi peer-to-peer WebSockets with sub-10ms latency.
- **Touchless Operational UX:** Developed a touchless kitchen display interface designed for greasy kitchen environments, featuring a real-time order aggregator ("Meat Counter") that computes required grill items by chronological FIFO priority.
- **Automated Testing Suite (Jest):** Implemented 37 automated unit and integration tests covering the complete order state machine, custom item notes, and nightly automatic reset routines.

OrenAI — 3D Mineral Exploration Platform & Research Paper (IEEE TSE)

Three.js / WebGL / React

2025 – Present

- **Interactive 3D Sub-surface Visualization:** Developed a WebGL 3D sub-surface viewer in Three.js and React, rendering geological point clouds, mineral deposit meshes, and interactive 2D geospatial mapping layers.
- **Scientific Publication:** Co-authored a research paper submitted to the prestigious **IEEE Transactions on Software Engineering (IEEE TSE)**, responsible for system architecture diagrams, user interaction flows, and technical documentation.

EDUCATION & CERTIFICATIONS

B.S. in Software Engineering — UniEVANGÉLICA

4th Semester | Expected: 2027/2028

- Evening classes — **100% available for full-time business hours (Monday – Friday)**.
- Vice-President of the CodeUp Academic Directory; Director of Arts & Tech Culture.

Desktop Developer Track: C#, Java, Relational Databases (SQL), OOP, UML — Instituto Mix

Oct 2022 – Jun 2024

- Practical coursework in Object-Oriented Programming, Relational Modeling, and Distributed System Fundamentals.

- **Certifications:** Scrum Fundamentals Certified (SFC™) · Technical Storytelling & System Documentation.
- **Languages:** Portuguese (Native) · English (Advanced — Fluent technical documentation, scientific writing, and verbal collaboration).
