PROFESSIONAL SUMMARY

Software Engineering undergraduate (4th semester @ UniEVANGÉLICA) with deep hands-on expertise in **Java 21**, **Spring Boot 3**, **Virtual Threads**, Object-Oriented Programming (OOP), and asynchronous architectures. Co-author of a scientific research paper submitted to the **IEEE Transactions on Software Engineering (IEEE TSE)**. Proven track record of building and maintaining production-grade systems, including high-concurrency real-time WebSocket engines, multi-tenant enterprise backends, and low-level system software. Strong foundational knowledge of data structures, algorithms, relational databases (SQL), and clean code principles. Advanced professional English proficiency.

TECHNICAL SKILLS

Languages:	Java 21/17/11, Python 3.11+, C, TypeScript, SQL
Java & Backend:	Spring Boot 3.x, Spring Security, Spring Data JPA, Java 21 Virtual Threads, WebSockets, RESTful APIs, OOP, Design Patterns, Multithreading, Clean Architecture, H2 In-Memory
Databases & SQL:	PostgreSQL, MySQL, SQL Server, Redis, Database Modeling, Optimistic Locking (@Version)
DevOps & Tools:	Git, GitHub, Docker, Docker Compose, Linux/VPS, Maven, CI/CD (GitHub Actions), Nginx, PM2
Methodologies:	Scrum (Scrum Fundamentals Certified - SFC™), Agile, OWASP Top 10 Hardening, Algorithmic Problem Solving

SOFTWARE ENGINEERING EXPERIENCE & PROJECTS

CoreSync CRM — Enterprise B2B Multi-Tenant Platform

Java 21 / Spring Boot 3 — github.com/cauacreis/CoreSync-CRM

Backend Java Engineer

- **Multi-Tenant Architecture:** Engineered an enterprise SaaS backend using **Java 21** and **Spring Boot 3.2**, implementing strict logical tenant isolation with `TenantContext` via `ThreadLocal` extraction from custom JWT claims.
- **Spring AOP Audit Vault:** Designed clean domain logic leveraging **Spring AOP (Aspect-Oriented Programming)** to automatically intercept and persist critical business operations without cluttering business services.
- **Persistence & Performance:** Structured relational models with Spring Data JPA/Hibernate, implemented pagination, in-memory caching, and global IP rate limiting via Bucket4j.

NexoTrade-OS — High-Concurrency Financial Trading Engine

Java 21 / Virtual Threads — github.com/cauacreis/NexoTrade-OS

Java Backend Architect

- **Real-Time Stream Processing:** Built a high-throughput paper trading engine consuming live WebSocket tick streams from the Binance exchange, processing continuous market quotes with sub-millisecond response times.
- **Virtual Threads Concurrency:** Leveraged **Java 21 Virtual Threads (Project Loom)** to offload real-time persistence and order execution asynchronously without blocking the core WebSocket stream handler.
- **Algorithmic Execution:** Implemented an autonomous algorithmic trading module based on Simple Moving Average (SMA-50) volatility triggers with unit test coverage.

SKZ Trading — Production Digital Asset Arbitrage Platform

Production 24/7 — Jul 2026 – Present | skztrading.com

Full-Stack & Backend Architect

- **Microservices Architecture:** Architected and deployed 11 asynchronous Python microservices running 24/7 on Linux VPS, interfacing with high-volume external REST APIs with 99.9% uptime and sub-100ms response latency.

- **Financial Automation & Security:** Implemented automated reconciliation with safety margin floors preventing negative sales, paired with Ed25519/AES local cryptographic key security alined to OWASP Top 10.

MicroOS — Educational x86 32-bit Microkernel from Scratch C / Systems github.com/cauacreis/MicroOS

Systems Programmer

- Implemented a 32-bit x86 microkernel in C and Assembly (GAS) running on QEMU, featuring two-level virtual memory paging, Ring 3 userland process isolation, single-frame context switching, and a preemptive round-robin scheduler driven by a 100 Hz PIT timer.

EDUCATION & CERTIFICATIONS

B.S. in Software Engineering — UniEVANGÉLICA (Anápolis, GO, Brazil) Feb 2025 – Dec 2028 (Expected) · 4th Semester

Vice-President, CodeUp Academic Directory · Co-author of research paper submitted to IEEE TSE

Desktop Programmer Certification Track — Instituto Mix Oct 2022 – Jun 2024 (Completed)

Certifications: Java (Modules 1-2), C# (Modules 1-2), Relational Databases (SQL), OOP, and UML

Certifications: Scrum Fundamentals Certified (SFC™) — SCRUMstudy (03/2026) · Technical Storytelling — UniEVANGÉLICA (2025)

Languages: English: Advanced · Portuguese: Native · Spanish: Basic
