CAUÃ FELYPE CAETANO REIS

AI-Native Full-Stack Engineer · Data Platforms & Agentic Systems · Python / TypeScript

Itaguaru, GO — Brazil (Remote / Worldwide) +55 (62) 9 9452-1953 caua.reis.dev@gmail.com

linkedin.com/in/cauafelypereis github.com/cauacreis English: Advanced

PROFESSIONAL SUMMARY

AI-Native Full-Stack Software Engineer and researcher specializing in **high-velocity agentic development, data platforms, and distributed systems**. Pioneers an AI-assisted engineering workflow directing coding agents (Claude Code, Cursor, MCP integrations) to build, test, and ship end-to-end full-stack systems with complete architectural ownership. Co-author of an advanced scientific paper submitted to the **IEEE Transactions on Software Engineering (IEEE TSE)** on Explainable AI (XAI/SHAP), Multi-Agent Systems (MAS/MoE), and Human-in-the-Loop (HITL) active learning pipelines. Proven track record shipping production systems in **Python (FastAPI, AsyncIO)**, **TypeScript / React**, and relational/document databases (PostgreSQL, Redis), operating live 24/7 microservices with 99.9% uptime. Advanced professional English proficiency.

CORE TECHNICAL COMPETENCIES

AI-Native Engineering:	Multi-agent orchestration, Model Context Protocol (MCP), tool/data integrations, agent evals, RAG, prompt engineering, context management, Claude Code, Cursor
Languages:	Python 3.11+ (FastAPI, AsyncIO, aiohttp), TypeScript, JavaScript (ESNext), Java 21, SQL, C
Frontend & UI:	React 19/18, Next.js (App Router), Tailwind CSS, Vite, Three.js (WebGL 3D), PWA, Reactive Dashboards
Backend & Data:	RESTful APIs, WebSockets, Data Pipelines, PostgreSQL, MySQL, Supabase, Redis, Docker, Linux/VPS, CI/CD
Software Excellence:	Architectural review, edge-case detection, schema design, Big-O complexity analysis, OWASP Top 10, Scrum (SFC™ Certified)

RELEVANT EXPERIENCE & SHIPPED SYSTEMS

OrenAI — B2B GeoAI Data Platform & Research (IEEE TSE Paper) MAS / XAI

github.com/cauacreis/OrenAI

Technical Lead & AI Architecture Researcher

- **Multi-Agent Architecture (MAS / MoE):** Architected a distributed data platform using Mixture of Experts (MoE) in isolated Docker containers to process geochemical and satellite data pipelines, reducing multi-million dollar dry hole risks in mineral exploration.
- **Explainable AI (XAI) & Evals:** Co-developed an ML ensemble (XGBoost/LightGBM + CNNs) integrated with **SHAP (SHapley Additive exPlanations)**, deconstructing feature attributions to eliminate black-box inference across 100% of prediction outputs.
- **Human-in-the-Loop (HITL) Active Learning:** Engineered feedback workflows allowing human geologists to inspect 2D/3D subsurface WebGL models (Three.js), approve or reject inferences, and automatically feed corrected samples into incremental training loops.
- **Scientific Publication:** Co-authored a technical paper submitted to *IEEE Transactions on Software Engineering (IEEE TSE)*, formalizing system architecture, data ingestion pipelines, and explainability benchmarks.

SKZ Trading — Production Algorithmic Data Platform (24/7 Live) Production 24/7

Jul 2026 – Present | skztrading.com

Full-Stack & Backend Architect

- **High-Velocity Data Ingestion:** Architected and deployed 11 asynchronous Python microservices (`asyncio`, `aiohttp`) running 24/7 on Linux VPS, polling high-frequency market APIs every 20 seconds with sub-100ms latency and 99.9% uptime.
- **Outcome-Driven Risk Engine:** Implemented proprietary 4-layer liquidity scoring algorithms (0–100) with dynamic margin floors and automated financial reconciliation via webhooks (Mercado Pago PIX).

- **Executive Frontend:** Developed a real-time reactive dashboard in React (Vite) with 2FA QR code authentication, inventory management, and operational analytics tracking over 200 completed transactions.

LeadProspector — Autonomous AI Agent Platform (Open Source) Agent Loops github.com/cauacreis/LeadProspector

Lead Software & AI Engineer

- **Agent Loops & Tool Integrations:** Built an autonomous data platform integrating 9 external data APIs (Apollo, Hunter, LinkedIn, Google Maps, web scrapers), using state machines (8 stages) and multi-LLM fallback logic.
- **Data Modeling & Evaluation:** Implemented hybrid scoring algorithms combining deterministic ICP rules (40%) with LLM qualitative evaluations (60%), persisting structured lead insights into PostgreSQL and Redis.

GymFlow — Mobile-First Smart Gym & Performance SaaS Next.js / TypeScript Sep 2026 | gymflow-weld.vercel.app

Full-Stack Software Architect

- Shipped a complete mobile-first SaaS in **Next.js 14, TypeScript, and Tailwind CSS**, featuring an anti-fraud rotating encrypted QR code token system (30s cache TTL), interactive workout builders, and GymBot AI assistant.

EDUCATION, LEADERSHIP & CERTIFICATIONS

B.S. in Software Engineering — UniEVANGÉLICA (Anápolis, GO, Brazil) Feb 2025 – Dec 2028 (Expected) · 4th Semester

Vice-President, CodeUp Academic Directory · Finalist, Start Agro Innovation 2025

Certifications: Scrum Fundamentals Certified (SFC™) — SCRUMstudy (03/2026) · Technical Storytelling — UniEVANGÉLICA (2025)

Languages: English: Advanced (Scientific academic writing, technical decision explanations, verbal fluency) · Portuguese: Native
